603 initiatives

27month payback

HOW WE DID IT? A RECIPE COMPRISING 3 INGREDIENTS DEPLOYED TOGETHER

BLUE STREAM

- > Identify use-cases to deliver value
- > Catalogue Solutions, Innovations
- > Impact tracking

RED STREAM

- > Standardized future proof technical solutions
- > Cyber security
- > Enable technical capabilities

YELLOW STREAM

- > Upskilling
- > Change management along transformation
- > Minimize social impact

DMA | BLUE STREAM

Focus on scaling up through a factory-centric approach

Use case validation in each factory (4 months)

Sizing of the value of the opportunities through shopfloor observations

Use case definition and identification of digital solutions to enable operational improvements

>> Catalog & Digital Compass

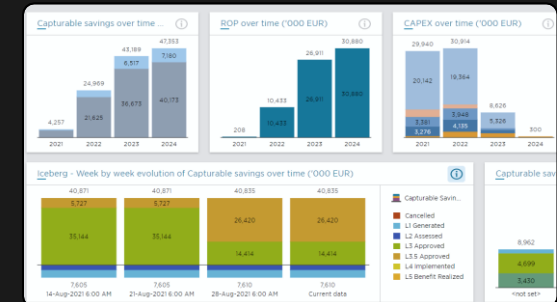

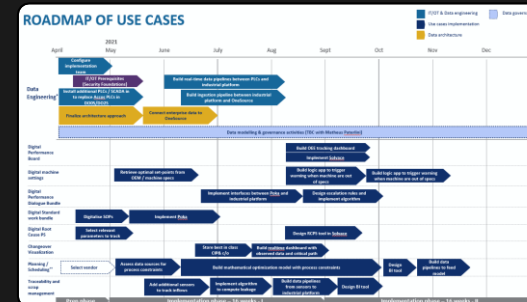

Construction of the roadmap to transform the plant in 2 years

Implementation (2-3 years)

Launch implementation sprints & Impact tracking routine

Provide funding to the plant

HOW TO ENSURE THE RIGHT LEVEL OF ADOPTION

CHANGE MANAGEMENT

To successfully and sustainably adopt changes, whilst minimizing the negative outcomes for the local teams

CENTERS OF EXCELLENCE

Engaging with the community of digital leaders and exchanging good practice

Industry 5.0 Academy

Ensuring the right level of skills and competencies by providing training, testing and innovation opportunities

USER ADOPTION & MATURITY MATRIX

Identifying the level of user adoption & maturity of the processes and driving improvements

DANONE TRANSFORMATION MODEL

Following the standard processes & tools for Change Management

WORKFORCE PLANNING

Encouraging strategic thinking of the workforce needs and the best way to develop capabilities

LOCAL INFLUENCERS

Conducting Social Network Analysis as a way to identify local change champions

CONTINUOUS IMPROVEMENT

To sustain the implemented solutions and create opportunities to grow

DMA | YELLOW STREAM

Digital maturity defined by two axis

MEGATRENDS SHAPING THE DYNAMICS OF OUR INDUSTRY

The world is in fast evolution, and key trends across 4 areas are shaping global consumer business

<p>01 Supply chain resilience and margin improvements</p> 	<p>02 Eco-efficiency as a must-have to stay in business</p> 	<p>03 Labor shortage combined to need for speed and productivity</p> 	<p>04 Polarization of demand and consumer centricity</p>

 2. United Nations Global Population Outlook;
 3. American Chamber of Commerce, American Bureau of Labor

INDUSTRY 5.0 PRINCIPLES

Industry 5.0 emphasizes the collaboration between humans and advanced technologies, such as AI-powered robots and IoT devices¹

Customization

- Offers hyper-customized products and services to meet individual customer needs.
- Uses advanced data analytics and flexible manufacturing processes to tailor products.

Resilience

- Builds robust systems that can withstand external shocks, such as pandemics or supply chain disruptions.

Human-Centric

- Prioritizing the well-being and empowerment of workers.
- Enhances human skills with the help of advanced technologies like AI and robotics.

Sustainability

- Promotes environmentally friendly practices.
- Encourages circular production models to reduce waste and improve resource efficiency.

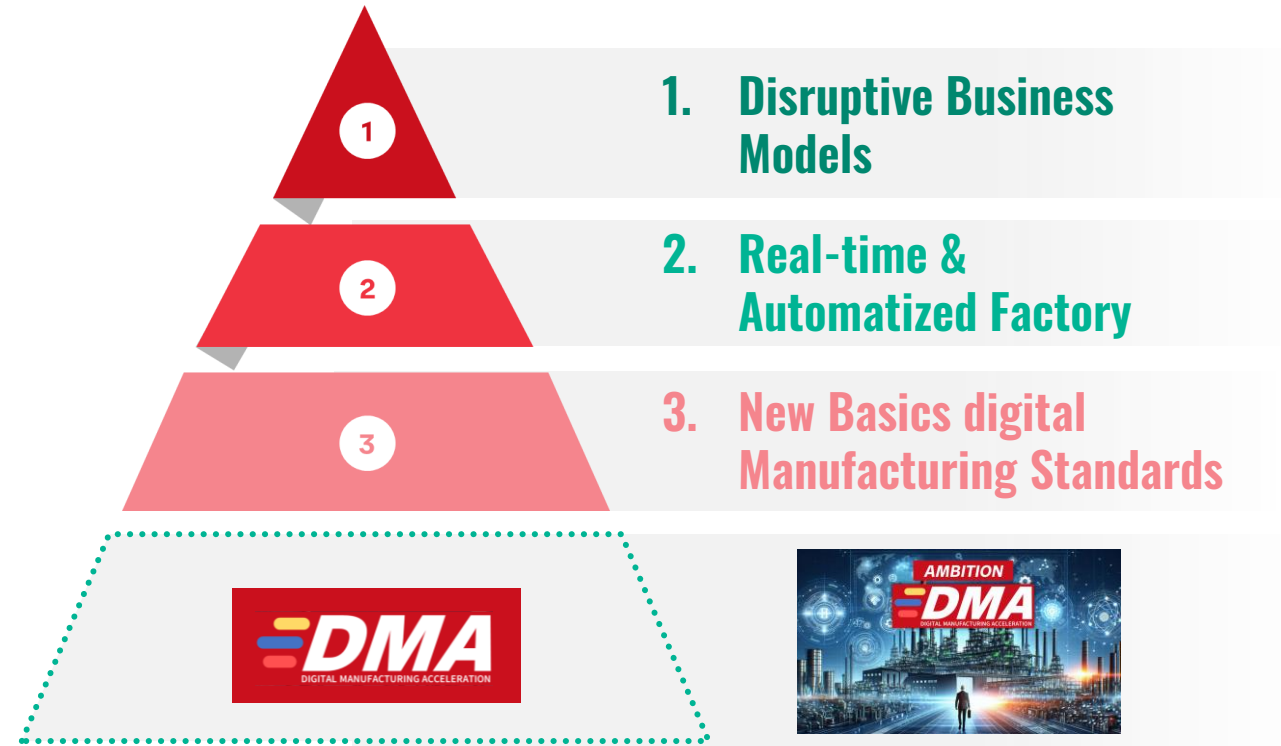

¹ European Commission 2021b. Industry 5.0. https://ec.europa.eu/info/publications/industry-50_en,

“Danone wants to step in the Industry 5.0 journey, moving from a 4.0 Follower position, to a 5.0 forefront leader position”

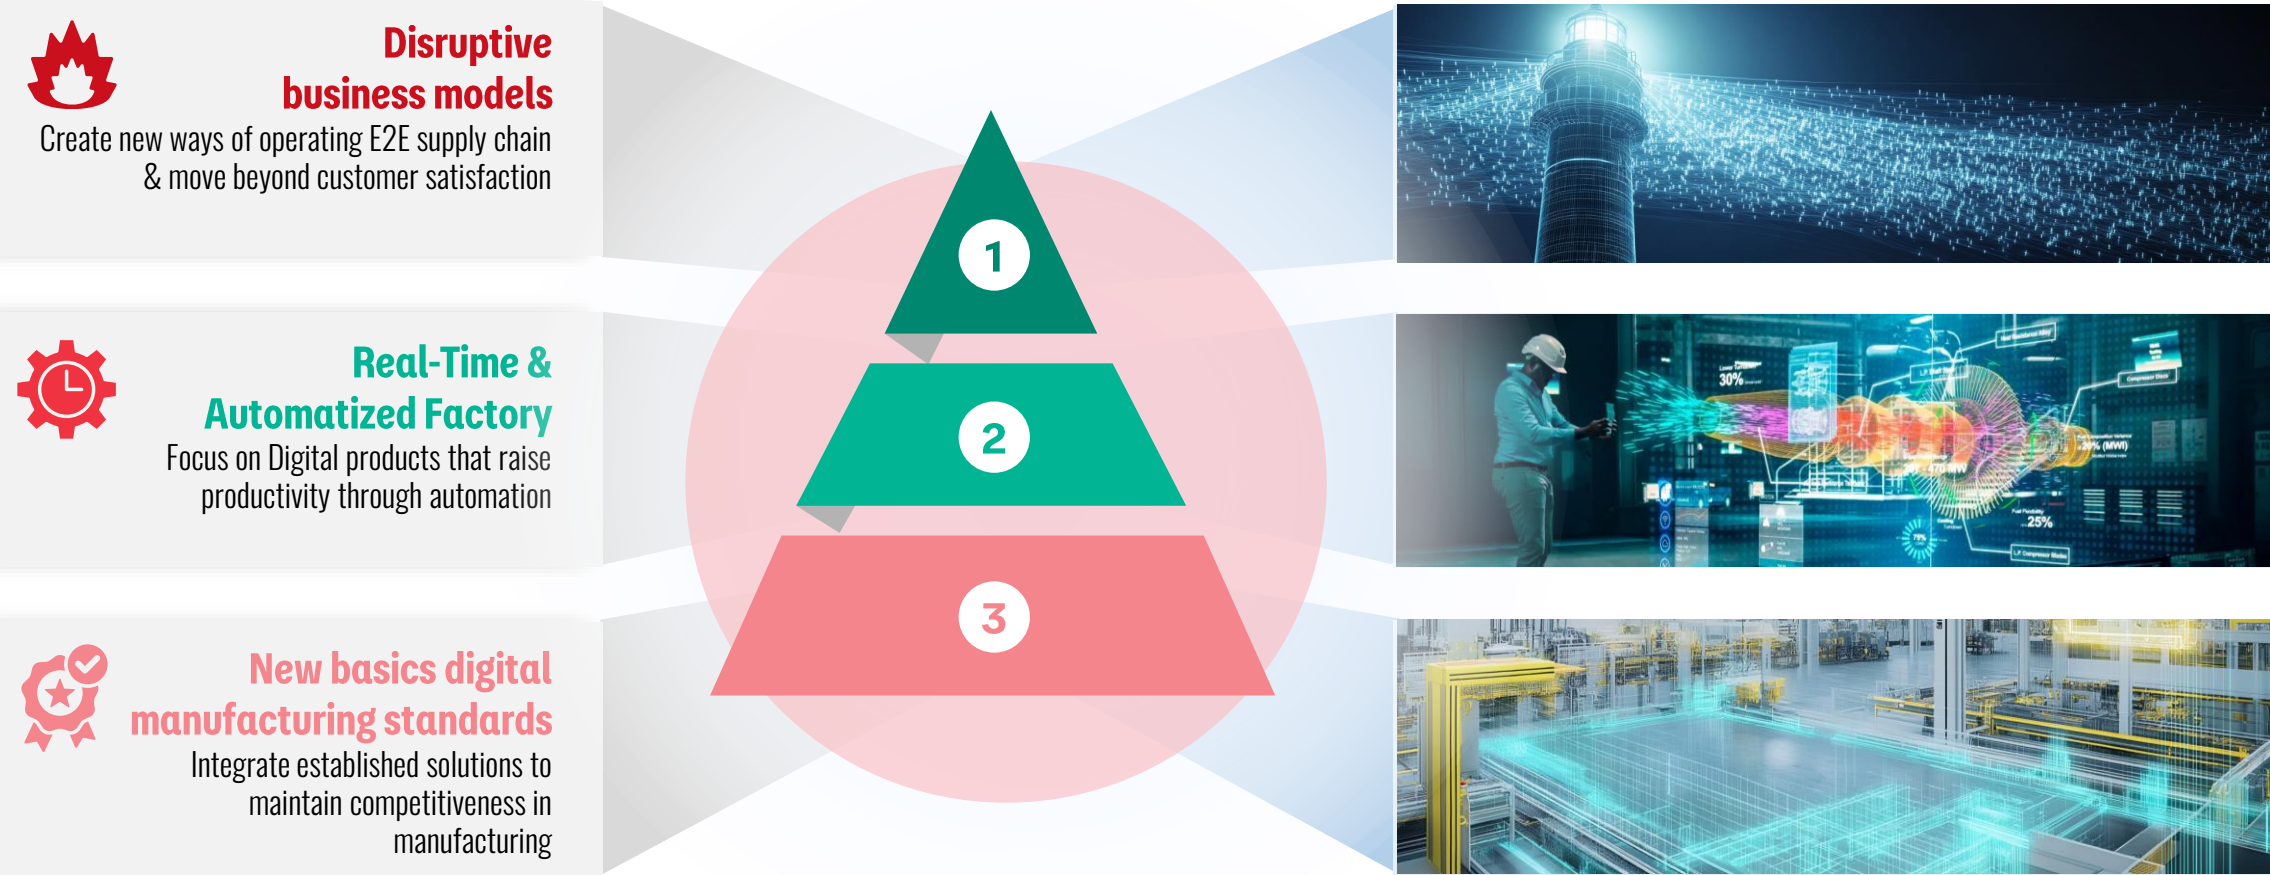

Vikram AGARWAL
COO Danone

AMBITION DIGITAL MANUFACTURING ACCELERATION

DIGITAL FACTORY OF THE FUTURE - STRATEGIC ROADMAP DIGITALIZATION

New technologies can enable both long-term durable growth and creation of disruptive business models

INDUSTRY 5.0 ACADEMY

GLOBAL INDUSTRY 5.0 ACADEMY

THE INDUSTRY 5.0 ACADEMY PROJECT: **WHY**

03

**Labor shortage
combined to need
for speed and
productivity**

Investments in upskilling and automation, to respond to aging/ shortage of workforce and improve employee value proposition and productivity

15%

Decrease in working
population predicted
by 2070

30M

Shortage of
manufacturing workers
by 2025³

THE INDUSTRY 5.0 ACADEMY PROJECT: **WHAT**

Purpose:

To equip proactively employees with the skills and knowledge needed for the future

Vision:

To create a sustainable structure and a culture of continuous learning, innovation, and adaptability

Focus on (5+3) competencies x 4 Levels:

Learner / Qualified / Experienced / Master

DIGITAL

1. Digital Literacy
2. Applications & Connected Shopfloor
3. Advanced automation
4. Data-driven Management & Analysis
5. Infrastructure & Security Management

FUNCTIONAL

6. Performance Management
7. Openness to Change
8. Business Knowledge

THE INDUSTRY 5.0 ACADEMY PROJECT: **HOW**

**Launching the
Industry 5.0 Academy
project to coordinate
initiatives
(DMA Global, Hubs,
Opole Industry 5.0
Center, Global L&D)**

ACROSS 3 STREAMS:

Workforce (Service Center)

Expertise (Sensei Center)

Academy (Training Center(s), Tech Lab, DanSkills)

THE INDUSTRY 5.0 ACADEMY PROJECT: **EXPECTED OUTCOMES**

Expertise Building
Upskilling
Talent Retention
Productivity Boost
at scale

Expertise Building: Develop expertise in emerging technologies, data analytics, and digital tools

Upskilling: Enhance existing skills to meet the demands of the factory of the future

Talent Retention: Provide growth opportunities to retain top talent

Productivity Boost at scale: Enable employees to work efficiently using digital tools, and leverage the power of centers of expertise
